AHMED MOHAMED NOAMAN

Flutter Developer & Mobile Application Engineer

Alexandria, Egypt | noamana455@gmail.com | github.com/noaman03 | LinkedIn

PROFESSIONAL SUMMARY

Computer Engineering student and Flutter developer focused on secure, scalable cross-platform applications. Completed AMIT Learning's Flutter Diploma with a 95% grade. Project experience includes feature-first Clean Architecture, modern state management, Firebase and Supabase integration, local persistence, real-time systems, computer vision and blockchain research, and native iOS development with Swift.

EDUCATION

B.Sc. Computer Engineering | Arab Academy for Science, Technology & Maritime Transport | 2021 - Expected 2026

High School Diploma | Sidi Gaber Language School

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Swift (iOS), native platform integration, responsive UI

Architecture: Feature-first Clean Architecture, layered UI/domain/data design, SOLID principles, functional programming, Dartz

State Management: Riverpod, BLoC, Cubit, Provider, GetX

Backend & Data: Firebase, Supabase Realtime, Cloud Firestore, SQLite, MySQL, Node.js, Express

Integrations: REST APIs, WebSockets, geolocation, push notifications, QR scanning, biometrics, PDF generation

Security & Tools: Cisco CyberOps, CCNA, Identity and Access Management, Git, GitHub, Postman, CI/CD, testing

SELECTED PROJECTS

Khayyer - Food Donation Platform - Graduation Project - Funded by ITIDA

A bilingual Flutter application connecting food donors, charitable organizations, and registered recipients through donation, campaign, and coordination workflows.

Stack: Flutter, GetX, Firebase Authentication, Cloud Firestore, Firebase Storage, Geolocator

- Structured donor, organization, and recipient experiences with controller, repository, model, service, and view layers.
- Integrated authentication, Firestore records, media uploads, GPS donation capture, bilingual content, and notification setup.
- The graduation-project research scope covers AI food-quality checks and blockchain traceability; the public code snapshot focuses on the application workflow.

PSA Academy - Sports Academy Management & Analytics

A Flutter Web platform for administrators, coaches, and players, covering academy attendance, training, operational records, and reporting.

Stack: Flutter Web, Firebase, Provider, Cloud Firestore, QR scanning, PDF

- Built role-aware administrator, coach, and player workflows for attendance, training assignments, and work sessions.
- Implemented QR generation and camera scanning for attendance plus PDF report generation and browser downloads.
- Managed payment and expense records within an evolving layered architecture backed by Firebase services.

Padel System - Court Booking & Club Management Portfolio Prototype

A role-oriented Flutter prototype for court discovery, booking records, player activities, and venue-owner operations.

Stack: Flutter, Firebase, Cloud Firestore, GetX, Riverpod, Geolocator

- Organized player and venue-owner experiences into feature-oriented modules with a mixed GetX and Riverpod state approach.
- Implemented Firestore court discovery, search, and booking-record paths with location-aware dependencies.
- Demonstrated reservation, tournament, open-match, owner-dashboard, and administration workflows while clearly retaining simulated prototype boundaries.

SELECTED CERTIFICATIONS

- Flutter Diploma (Grade: 95%) - AMIT Learning
- Developing Back-End Apps with Node.js and Express - IBM
- Cisco Certified CyberOps Associate (CBROPS) - NTI/Cisco
- CCNAv7: Switching, Routing, and Wireless Essentials - Cisco
- Database Technologies & Services - Professional Diploma
- Cloud Computing - Professional Certificate
- Developing iOS Applications with Swift - ITI
- Quality Assurance - Techniques & Methodologies
- CCNAv7: Enterprise Networking, Security, and Automation - Cisco
- Identity & Access Management - Professional Diploma
- Artificial Intelligence: Basic Level - WE Certificate
- Project Management in Practice - Professional Diploma
